

PRESS RELEASE

**SACYR GROWS IN CHILE WITH ITS ENTRY IN THE SECTOR OF
COMPLETE WATER CYCLE MANAGEMENT**

- **The group strengthens its activity in the country with the acquisition of four companies that provide service to more than 150,000 people.**

Santiago, Chile, February 6, 2020. Sacyr, through its subsidiary Sacyr Water, has signed an agreement for the acquisition of four companies in Chile dedicated to management of the complete water cycle. The expected business backlog exceeds 500 million euros.

Sacyr Water will manage services of **capture of raw water, distribution of potable water, collection and purification of wastewater** for a population of **150,000 inhabitants**, with a workforce of approximately 200 employees.

The operation includes the purchase of **four companies that provide services in the city of Antofagasta and the towns in the Metropolitan region of Santiago**, namely Colina, Lampa, Lo Barnachea, Valle Escondido, Los Álamos and Pan de Azucar.

With this operation, Sacyr is strengthening its commitment to Chile, where it is the **leading private investor in the country's transport infrastructure**. It also has activity in industry, facility services and infrastructure conservation.

Sacyr Water

Sacyr Water has experience with **more than 100 plants designed and built throughout the world**. The Sacyr subsidiary carries out the management of the complete water cycle and operates and maintains more than 13,000 km of supply networks and more than 108,000 drains and manholes in six countries, in which it supplies 10 million inhabitants.

PRESS RELEASE

Sacyr's extensive experience in water management and treatment will help increase the efficiency levels of the services in Chile and provide innovative solutions for sustainable development of the water sector.
