

**PRESS RELEASE**

**SACYR ENVIRONMENT WINS THE CONTRACT FOR STREET CLEANING  
AND WASTE COLLECTION SERVICES IN  
COLLADO VILLALBA (MADRID) WORTH €70 MILLION**

- **The fleet of vehicles and equipment will be replaced by more sustainable and less noisy eco-efficient versions**
- **The company will build a composting plant for organic and pruning waste**

**Madrid, March 4, 2020.-** Sacyr Environment, an environmental services subsidiary of Sacyr, has been awarded the contract for municipal solid waste collection, street cleaning and maintenance of waste bins and containers in the municipality of Collado Villalba (Madrid), worth €69.7 million. The contract is for a period of 10 years, renewable for a further two years.

Sacyr will invest more than €6.5 million in vehicles, equipment, containers, facilities and computer systems, primarily with the aim of providing **a more efficient and sustainable service**.

**More sustainable vehicles and side-loading collection system**

The service improvements that Valoriza will make include:

- Incorporation of **new, more sustainable vehicles** that create less pollution, being either electric or running on compressed natural gas, and allow noise levels to be greatly reduced. The improvements will also include **real-time fleet management** computer systems to facilitate the management and control of the services performed at any time.

- All equipment will have **innovative technology**, using **noise reduction and water saving** systems.

- Modification of **the side-loading collection system**.

- Increased frequency of waste collection.

- Installation of a new waste processing facility in the P-29 industrial estate.

- A new mobile waste collection unit.

## **PRESS RELEASE**

- Two mobile units close to sports facilities that will facilitate recycling at source.
- Construction of new facilities for the service that will be self-sustaining with renewable energy, producing zero atmospheric CO<sub>2</sub> emissions.

### **Pioneering composting plant**

In addition, Valoriza will build a pioneering composting plant that will be used to treat waste deriving from the municipality's organic and pruning waste collection service.

### **Pilot program for the organic fraction**

With this contract, the municipality will begin separate collection of the organic fraction. This will start with a pilot program that will serve as a reference for the progressive implementation of the collection of this fraction throughout the municipality.

This pilot program and its subsequent implementation will be accompanied by awareness-raising campaigns, which will provide residents with all the information necessary to correctly separate this fraction at home.

**Sacyr Environment** provides waste collection and street cleaning services in 400 municipalities in Spain (Madrid, Santa Cruz de Tenerife, Albacete, Toledo, Guadalajara, Soria and Cádiz, among others) and Colombia. The company has a total client base worth over €2 billion and provides services to more than five million people.
